Part III DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-7 are pending.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2181.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1-7 are rejected under 35 U.S.C. § 102(e) as being anticipated by Regan et al. (US No. 6,578,086).

In regard to claims 1, 2, 5, Regan et al. disclose a layer 2 switch comprising a plurality of ports, at least one port of the plurality of ports capable of being set to a status of uplink enabled (see col. 5, lines 21-48); first circuit for running a spanning tree protocol (STP) in the layer 2 switch, the STP capable of selecting the at least one port as either a designated port or as a root port (see col. 2, lines 4-25); a second circuit for running uplink enable process, the uplink enable process determining whether or not a port set to uplink status has been selected by STP as a designated port (see col. 6, lines 12-59) and blocking circuits to set at least one port into block state, in response to at least one port being both in uplink state and selected by the STP as a designated port (see col. 6, lines 12-59).

In regard to claims 2, 4, Regan et al. disclose a layer 2 switch comprising a plurality of ports, at least one port of the plurality of ports capable of being set to a status of uplink enabled (see col. 5, lines 21-48); first circuit for maintaining the at least one port blocked status and for transitioning the port into forwarding status (see col. 5, line 58 through col. 6, lines 34); a second circuit for running uplink enable process, the uplink enable process determining whether or not a port set to uplink status has been transitioned to forwarding status (see col. 5, line 58 through col. 6, line 45) and blocking circuits to set at least one port into block state, in response to at least one port being both in uplink state and transitioned to forwarding status (see col. 6, lines 12-59).

In regard to claims 6, 7, Regan et al. disclose the programmable logic devices to implement the method (see col. 10, line 62 through col. 11, line 4).

Conclusion

6. All claims are rejected.
7. The prior arts made of record and not relied upon are considered pertinent to applicant's disclosure.

Ding et al. (US No. 6,519,231) disclose a method and apparatus providing a spanning tree protocol for a data communications network having a multi-link trunk.

Lee (US No. 5,737,316) discloses a method and device for determining link status in a computer network.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Raymond Phan, whose telephone number is (703) 306-2756. The examiner can normally be reached on Monday-Friday from 6:30AM- 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Primary, Paul Myers can be reached on (703) 305-9656 or via e-mail addressed to paul.myers@uspto.gov. The fax phone number for this Group is (703) 746-7239.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [raymond.phan@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3900.
